

# David design

## David design's relationship with customers, suppliers and other partners.

David design develops, produces and distributes a premium collection of furniture, lighting and accessories together with world-leading designers. In our basic values and our way of being, it must always be clear that we care about people, the environment and the economy. It is DNA in David design's business and something that all employees undertake to follow.

David design's three values are Commitment - Responsibility - Joy

### **Commitment.**

We have a passion for what we do and it should be clearly felt by the people we meet. David design is passionate about making our world fair, honest and beautiful. This applies to all contacts with David design, whether it is a customer, architect, designer, co-worker, supplier or other partner. Everyone should be treated with the utmost respect and we should expect to be treated in the same way back.

### **Responsibility.**

We all have a shared responsibility to our earth. It starts for David design in the first contact and should then be a matter of course in the long-term relationships we build. David design should be trusted. There must be honesty in both products and collaborations. What we leave behind should give a strong positive impression but as small an impression as possible.

Environment, recycling and circular flows have always been the basic requirements for David design. That is why we produce at home in Sweden and in our own factory where even clothing is included. David design should be a role model and all materials that are possible should be renewable. That is why, for example, all the frames in our chairs are made of wood. A material that also gives us the opportunity to change again and again. The design includes since 1998 that it should be possible to use individual material in different parts, eg seat and back of the chair. It gives longer life in materials and that you never have to throw away any part. We use waste materials in other products. David design has a durability guarantee which means that we always guarantee to take back parts and reuse. An architect once coined the expression that a David design piece of furniture is a piece of furniture that is never thrown away. We think about this every day when we create, manufacture and renovate David design furniture.

Relationships with co-workers and partners must be with respect for all people. David design cares about diversity and the value of all people. Compliance with democracy and human rights is an absolute requirement and even here it is so much easier to follow when we produce closely.

### **Joy.**

We are happy to share joy. This is one of the main reasons for choosing products from David design. Therefore, it is also important that you thrive in the relationship with David design with colleagues, suppliers, customers or other partners. At David design, we usually say that we must have joy in the job to be able to perform sales and more than satisfied customers.

Welcome to David Design and to be a part of our family for the future.
